

How do you *really* feel?

You may benefit from a science-based metabolic detoxification program.

- Do you often feel tired or have a lack of energy?
- Do you have sore muscles for no apparent reason?
- Do you have difficulty concentrating?
- Are you easily irritated or moody?
- Do you have trouble sleeping?
- Do you wake up feeling unrefreshed?
- Do you feel bloated or gain weight easily?
- Do you have digestive or intestinal discomfort?
- Do you feel like you're not as healthy as other people your age?

If you answered "yes" to any of the questions above, then ask your healthcare provider about the potential benefits of a metabolic detoxification program.

Staying Healthy in Today's Environment

With new harmful compounds such as industrial chemicals and pollutants being produced every year—infiltrating our soil, air, water, and food supply—exposure is an unfortunate yet unavoidable fact of modern life. A “harmful compound” refers to any substance that has the potential to interfere with cellular function and our health. Our bodies are designed to be able to process and remove these harmful compounds via key elimination channels, including our digestive system, liver, and kidneys. However, individuals may vary in how harmful compounds affect their health.

Are you feeling the signs of “environmental overload”?

Over time, the buildup of unhealthy chemicals from the environment and lifestyle choices may compromise the way your body works, and can even affect your health. The first subtle signs of environmental burden may include a lack of energy or feeling physically or mentally “run down.” You can help by supporting your body’s ability to remove unwanted and potentially harmful compounds.*

Environmental overload resistance

This describes your ability to process and eliminate harmful compounds effectively and refers to the impact they may be having on your health. In the modern world, it’s less common for health issues to arise due to high levels of exposure to a single compound. Rather, health challenges may arise as a result of the additive effects of low-level exposure to a broad range of dietary and environmental compounds.

With support and guidance from your healthcare practitioner, following a detoxification program can be one of the most effective strategies for promoting better health.*

The Clear Change® Program

Safe and effective metabolic detoxification program without the hassles or hunger*

The Clear Change Program was scientifically designed to support the body’s natural process of metabolic detoxification—helping to remove unwanted compounds to keep your body running and feeling its best.*

This clinically designed program includes:

- Targeted support with a nutritional supplement, powdered nutritional product, and shaker cup
- Program guide with easy-to-follow instructions, menu plans, and recipes
- Low-allergy-potential food plan with a wide range of choices and no calorie restrictions
- Online support, including FAQs and helpful lifestyle tips

A smart routine for long-term wellness

It takes just 10 days to do something great for your health and energy metabolism. Make it a regular part of your plan for more vibrant living as you age. Think of it as a “spring cleaning” or tune-up to clear out some of the junk and get your body back to its peak cleansing performance again. It’s a habit that may benefit long-term wellness and help keep you feeling your best.*

A better plan for metabolic detoxification

The Clear Change Program enhances the body’s natural metabolic detoxification process while providing adequate fuel for both cleansing and other daily activities, supporting energy metabolism and overall well-being. It includes science-based nutritional recommendations for balanced metabolic detoxification support, along with a simple eating plan that removes common foods that can increase internal burden. Best of all, you can still enjoy a variety of solid foods without going hungry.*
